Mayfield and Obion Cr., Bayou de Chien, Mississippi River - Accounting Unit 080102 (1,115 sq. mi.)	177
Mayfield Cr., Obion Cr., Bayou de Chien - Catalog Unit 08010201 (969 sq. mi.)	177
Mississippi River, Reelfoot Lake - Catalog Unit 08010202 (146 sq. mi.)	180

HYDROLOGIC UNITS

The U.S. Geological Survey prepared a set of maps depicting approved boundaries of, and numerical codes for, river-basin units of the United States¹. Eight digit codes represent 21 Regions, 222 Sub-regions, 352 Accounting Units, and 2,150 Cataloging Units. In addition, in Kentucky the U.S. Geological Survey extended the Hydrologic Unit concept down to even smaller units--11 digit hydrologic units and 14 digit hydrologic units. In Kentucky there are 3 [Regions](#), 8 [Sub-regions](#), 13 [Accounting Units](#), and 42 [Cataloging Units](#), 616 11-digit Hydrologic Units, and 9,109 14-digit Hydrologic units. About 94.2 percent of Kentucky lies in the Ohio River basin (Region 05), 2.6 percent lies in the Lower Tennessee River basin (Region 06), and 3.2 percent lies in the Mississippi River basin (Region 08).

The 14-digit code is in the format

RRSSAACCEEEFFF,

where, RR is the Region code,
SS is the Subregion code,
AA is the Accounting Unit code,
CC is the Cataloging Unit code,
EEE is the 11-digit code, and
FFF is the 14-digit code.

For example, the 14 digit code for the Meadow Fork unit in the Yonts Fork watershed which lies in the North Fork of the Kentucky River is:

05100201010170

where,

Ohio River Region = 05,
Kentucky River-Licking River Subregion = 10,
Kentucky River Accounting Unit = 02,
North Fork Kentucky River Cataloging Unit = 01,
Yonts Fork 11-digit code = 010, and
Meadow Fork 14-digit code = 170.

Stream names for this catalog were taken from the stream coverage produced the the Kentucky Natural Resources Information System (KNRIS). 11 AND 14 digit HUCs are shown in the listing below in the format:

Name	Unit Code	Drainage area (sq. mi.)
