

Kentucky Geological Survey
James C. Cobb, State Geologist and Director
University of Kentucky, Lexington

**Regional Groundwater Quality in Watersheds of
the Upper Cumberland, Lower Cumberland, and
Lower Tennessee Rivers, and the
Jackson Purchase Region
(Kentucky Basin Management Unit 3)**

R. Stephen Fisher, Bart Davidson, and Peter T. Goodman

Our Mission

Our mission is to increase knowledge and understanding of the mineral, energy, and water resources, geologic hazards, and geology of Kentucky for the benefit of the Commonwealth and Nation.

Figures

1. Physiographic regions, Basin Management Units, and major river watersheds in BMU 3	5
2. Cumulative plot of pH values.....	13
3. Sampled sites and ranges of pH values.....	14
4. Summary of pH values grouped by physiographic region.....	16
5. Summary of pH values grouped by major watershed	16
6. Comparison of pH values from wells and springs	16
7. Plot of pH values versus well depth	16
8. Cumulative plot of total dissolved solids values	17
9. Sample sites and ranges of total dissolved solids values.....	18
10. Summary of total dissolved solids values grouped by physiographic region	19
11. Summary of total dissolved solids values grouped by major watershed	19
12. Comparison of total dissolved solids values from wells and springs.....	19
13. Total dissolved solids values versus well depth.....	19
14. Cumulative plot of conductance values	20
15. Sample sites and ranges of conductance values.....	21
16. Summary of conductance values grouped by physiographic region	22
17. Summary of conductance values grouped by major river watershed	22
18. Comparison of conductance values from wells and springs.....	22
19. Conductance versus well depth.....	22
20. Cumulative plot of hardness values	23
21. Sample sites and ranges of hardness values	24
22. Summary of hardness values grouped by physiographic region.....	25
23. Summary of hardness values grouped by major river watershed	25
24. Comparison of hardness values from wells and springs.....	25
25. Hardness values versus well depth	25
26. Cumulative plot of total suspended solids values.....	26
27. Sample sites and ranges of total suspended solids values	27
28. Summary of total suspended solids values grouped by physiographic region	28
29. Summary of total suspended solids values grouped by major watershed	28
30. Comparison of total suspended solids values from wells and springs	28
31. Total suspended solids values versus well depth.....	28
32. Cumulative plot of chloride values.....	29
33. Sample sites and ranges of chloride values	30

Figures (Continued)

34.	Summary of chloride values grouped by physiographic region	31
35.	Summary of chloride concentrations grouped by major watersheds	31
36.	Comparison of chloride values from wells and springs	31
37.	Chloride concentrations versus well depth	31
38.	Cumulative plot of sulfate values.....	32
39.	Sample sites and ranges of sulfate values	33
40.	Summary of sulfate values grouped by physiographic region.....	34
41.	Summary of sulfate values grouped by major watershed	34
42.	Comparison of sulfate values from wells and springs	34
43.	Sulfate values versus well depth	34
44.	Cumulative plot of fluoride values	35
45.	Sample sites and ranges of fluoride values	36
46.	Summary of fluoride values grouped by physiographic region	37
47.	Summary of fluoride values grouped by major watershed.....	37
48.	Comparison of fluoride values from wells and springs.....	37
49.	Fluoride values versus well depth	37
50.	Cumulative plot of arsenic values.....	38
51.	Sample sites and ranges of arsenic values.....	39
52.	Summary of arsenic values grouped by physiographic region	40
53.	Summary of arsenic values grouped by major watershed	40
54.	Comparison of total and dissolved arsenic values	40
55.	Comparison of arsenic values from wells and springs	40
56.	Arsenic concentrations versus well depth	40
57.	Cumulative plot of barium values in BMU 3.....	41
58.	Sample sites and ranges of barium values	42
59.	Summary of barium values grouped by physiographic region.....	43
60.	Summary of barium values grouped by major watershed	43
61.	Comparison of total and dissolved barium values	43
62.	Comparison of barium values from wells and springs.....	43
63.	Barium values versus well depth	43
64.	Cumulative plot of iron values	44
65.	Sample sites and ranges of iron concentrations	45
66.	Comparison of iron values grouped by physiographic region.....	46
67.	Comparison of iron values grouped by major watershed	46
68.	Comparison of total and dissolved iron values.....	46
69.	Comparison of iron values from wells and springs.....	46
70.	Iron values versus well depth.....	46
71.	Cumulative plot of manganese values	47
72.	Sample sites and ranges of manganese concentrations.....	48
73.	Comparison of manganese values grouped by physiographic region	49
74.	Comparison of manganese values grouped by major watershed	49
75.	Comparison of total and dissolved manganese values	49
76.	Summary of manganese concentrations grouped by site type	49
77.	Manganese values versus well depth	49

Figures (Continued)

78.	Cumulative plot of mercury values	50
79.	Sample sites and ranges of mercury values	51
80.	Comparison of mercury values grouped by physiographic region	52
81.	Comparison of mercury values grouped by major watershed	52
82.	Comparison of dissolved and total mercury values	52
83.	Comparison of mercury values in springs and wells	52
84.	Mercury concentrations versus well depth	52
85.	Cumulative plot of nitrate-nitrogen concentrations	54
86.	Sample sites and nitrate-nitrogen values	55
87.	Summary of nitrate-nitrogen values grouped by major watershed	56
88.	Summary of nitrate-nitrogen data grouped by physiographic region	56
89.	Comparison of nitrate-nitrogen concentrations from wells and springs	56
90.	Nitrate concentrations versus well depth	56
91.	Sites where nitrite-nitrogen has been measured	58
92.	Cumulative plot of ammonia-nitrogen values from BMU 3	59
93.	Sample sites and ammonia-nitrogen values	60
94.	Ammonia-nitrogen data grouped by physiographic region	61
95.	Ammonia-nitrogen data grouped by major watershed	61
96.	Comparison of ammonia-nitrogen concentrations grouped by site type	61
97.	Ammonia-nitrogen concentrations versus well depth	61
98.	Cumulative plot of orthophosphate values in BMU 3	62
99.	Sample sites and orthophosphate-P values	63
100.	Comparison of orthophosphate values from springs and wells	64
101.	Orthophosphate values versus well depth	64
102.	Cumulative plot of total phosphorus values	65
103.	Sample sites and ranges of total phosphorus values	66
104.	Summary of total phosphorus values grouped by physiographic region	67
105.	Total phosphorus values grouped by major watershed	67
106.	Comparison of total phosphorus values from wells and springs	67
107.	Total phosphorus concentrations versus well depth	67
108.	Locations of sites where 2,4-D was measured and ranges of 2,4-D values	70
109.	Locations of sites where alachlor was measured and ranges of alachlor values	72
110.	Comparison of alachlor values in wells and springs	73
111.	Locations of sites where atrazine was measured and ranges of atrazine values	75
112.	Comparison of atrazine values from wells and springs	76
113.	Atrazine concentrations versus well depth	76
114.	Locations of sites where cyanazine was measured and ranges of cyanazine values	78
115.	Locations of sites where metolachlor was measured and ranges of metolachlor values	80
116.	Comparison of metolachlor values in wells and springs	81
117.	Metolachlor values versus well depth	81
118.	Locations of sites where simazine was measured and ranges of simazine values	82
119.	Sample sites and ranges of benzene values	84
120.	Sample sites and ranges of ethylbenzene values	86
121.	Sample sites and toluene values	88

Figures (Continued)

122.	Sample sites and total xylene values.....	90
123.	Sample sites and MTBE values	92
