

DRILL LOG - HOLE No. Ph-6 (25-2)

County: Sussex
 Quad: Harbeson
 Elev: 35' ASL
 Driller: Josh Williams
 Logger: K. J. Stanaway

LAT:
 LONG:
 Drilled: August 27, 1975
 T.D.:
 Drill Method: Auger
 Sample Method: 1/4 Auger flight

Depth in Feet

<u>From</u>	<u>To</u>	<u>Description</u>
0	9	Sand, top 2' brown merging downward to light tan from 2' on down, mod-poorly sorted, fine-med., silty, grains subround increasing coarse sand and granules downward to
9	12	Coarse Sand, tan-white, poorly sorted, coarse-medium-fine, silty with granules, occasional 1 cm quartzose and argillaceous pebbles, angular, low sphericity; grains subround-subangular; grades down to
12	38	Sand, tan-white, poorly sorted medium with some coarse & fine grains & granules, silty, some clay balls
38	44	Sand, tan-brown ditto gradational on bottom 2' to
44	52	Sand, tan-brown, mod-well sorted, fine with some granules & coarse sand (~10%), subangular-subround, silty
52	54	Sand, tan, ditto but increasing coarseness to
55	60	Gritty sand, tan brown, poorly sorted, coarse-med-fine grains & granules very silty (samples caked, hard drilling like clay); pebbles at 57-60' up to 2 cm, quartzose, subangular mod sphericity.
