vore QP1-82: East of Quillen's 0-1.4 feet: Brown-gray muddy sand; poorly sorted. Sample QP1-1 1.4-1.7 feet: Brown mud, few organics. 1.7-4.5 feet: Brown mud; plant fragments  $\sqrt{\Gamma}$ abundant at top, decreasing toward

base of core.

Core log QP1-82. See Appedix for detailed sediment analysis. Figure 14a.

Core QP2-82: West of Broke.

0-1.8 feet: Dark gray muddy sand; poorly sorted. Sample QP2-1 1.8-4.4 feet: Light gray sand; fine grained; well-sorted. Shell debris and pebbles at upper contact. Sample QP2-2 Parallel laminae with heavy minerals in lower section of core.

Core log QP2-1. See Appendix for detailed Figure 14b. sediment analysis.
