

P, 51-12

Core QP3-82: East of Broken Marshes

0-1.2 feet: Dark gray sand, fine grained, small amount of mud; grading downward to clean sand; micaceous.

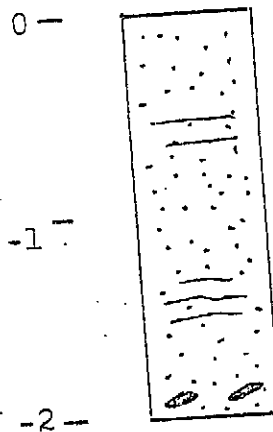

1.2 feet: Shell debris (bivalves, gastropods).

← Sample QP3-1

1.2-3.9 feet: Gray sand, fine grained, well-sorted; horizontal to low-angle laminae; heavy minerals.

Figure 14c. Core log QP3-82. See Appendix for detailed sediment analysis.

Core QP4-82: North of Broken Marshes

0-2.0 feet: Dark gray medium sand; small amount of mud; some mottling.

← Sample QP4-1

Clay nodules

Figure 14d. Core log QP4-82. See Appendix for detailed sediment analysis.
