6/20/72

- 0-5 Top soil and sand, med. brown and gray
- 5-10 Sand, gray, fine to med., (water table abt. 6')
- 10-15 Same
- 15-20 Sand, gray brown, fine to med.
- 20-25 Same
- 25-30 Same
- 30-35 Same
- 35-40 Same, samples from here down may not be representative
- 40-45 Same
- 45-50 Same
- 50-55 Same, chert fragments rare
- 55-60 Same (no change in drilling rate or feel)
- 60-65 Sand, med. gray, coarser fraction increasing
- 65-70 Same
- 70-75 Same, streak of gravel at 71'

CORE: 75-76.5 - Sand, med. to coarse, brown and white, poorly sorted, approx. 65% recovery.

- 75-80 Drilling easy, samples not representative
- 80-85 "
- 85-90 "
- 90-95 " , streak of gravel at 91'
- 95-100 Drilling harder, 97-100', blue clay off auger at 100'
- 100-105 No returns

CORE attempt: No recovery

- 105-110 Off augers: Med. sand, gray, well sorted, off augers at 105'
- 110-115 No returns
- 115-120 " , drilling easier
- 120-125 " drilling easier
- 125-130 " drilling varies
- 130-135 " "
- 135-140 " drilling easier

140-145	No returns, drilling easy
