Core QP1-82: East of Quillen's Point

0-1.4 feet: Brown-gray muddy sand; poorly sorted. -Sample QP1-1 1.4-1.7 feet: Brown mud, few organics. 1.7-4.5 feet: Brown mud; plant fragments abundant at top, decreasing toward 业 base of core.

Figure 14a. Core log QP1-82. See Appedix for detailed sediment analysis.

Core QP2-82: West of Broke

0 -	O-1.8 feet: Dark gray muddy sand; poorly sorted.
1-	Sample QP2-1
2- 000	1.8-4.4 feet: Light gray sand; fine grained; well-sorted. Shell debris and pebbles at upper contact. Sample QP2-2
4-	Parallel laminae with heavy minerals in lower section of core.

Figure 14b. Core log QP2-1. See
Appendix for detailed sediment analysis.
