

WELL CODE BW-T-2-69

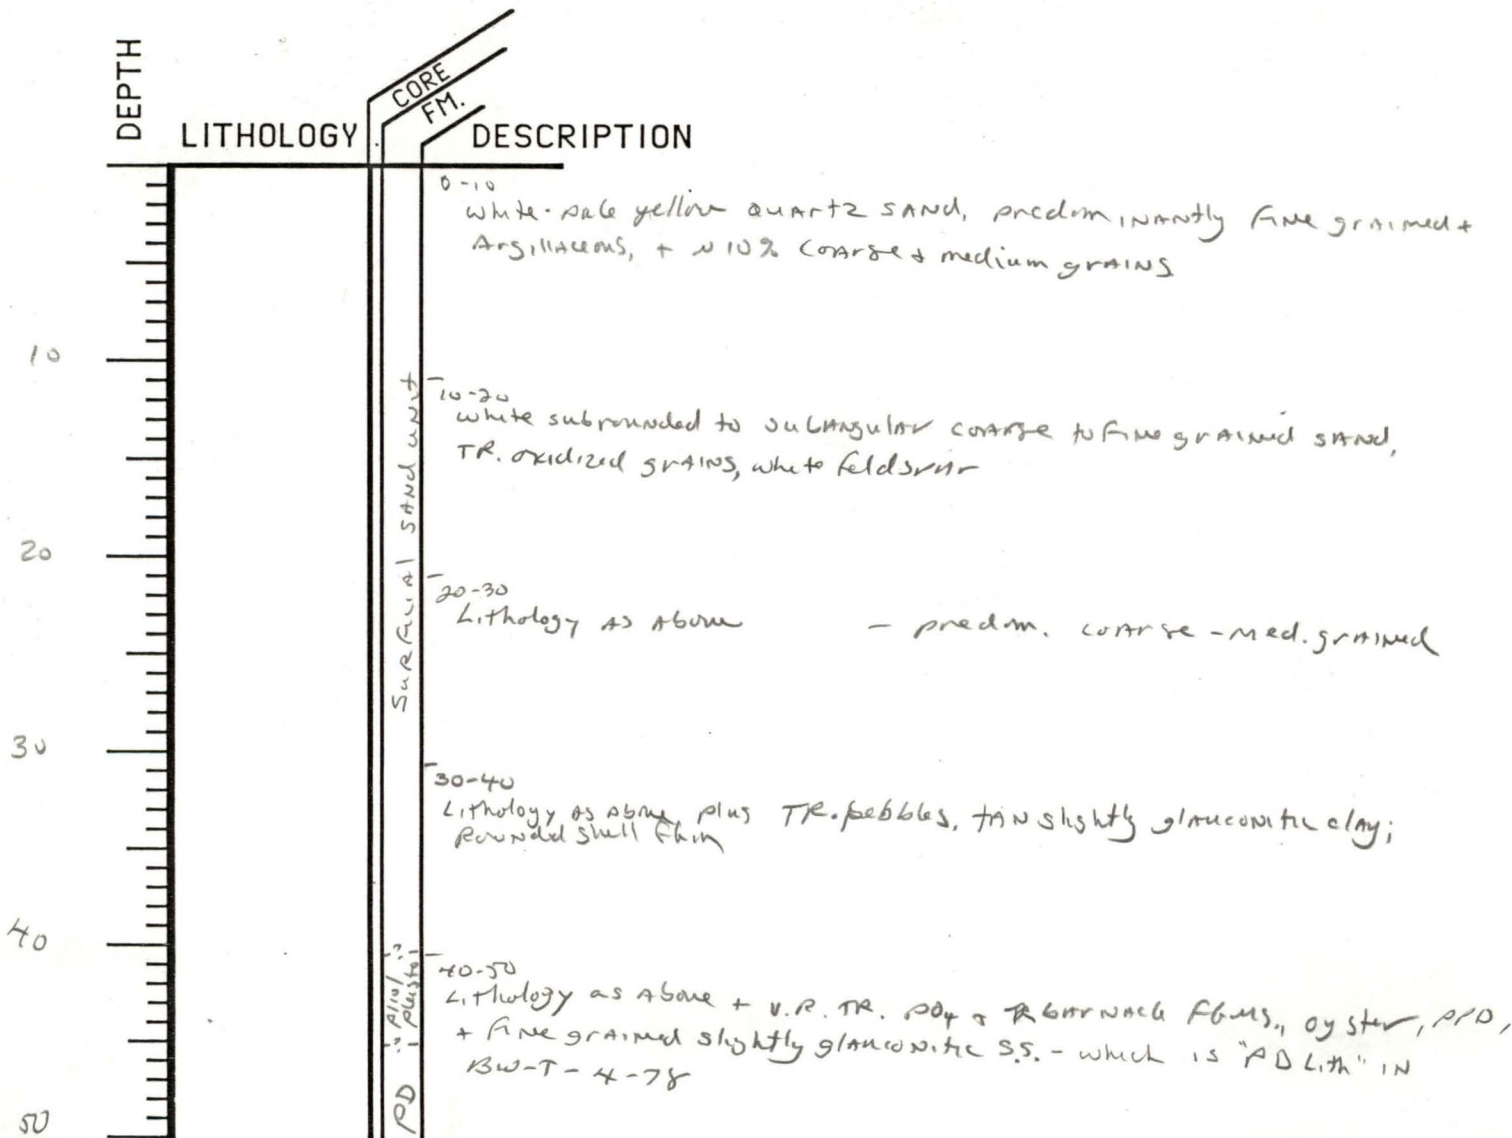

ELEVATION 50'

T.D. 370'

341830
780830

note: samples are washed
NO LOSS

tops are approximate - probably
some plio/pleistocene present based
on shells in 40-50' interval.
also, the fh. glau. ss. in 40-50'
interval is the presumed PD
lith. top.

50-60
pale grey fine grained g. laticonitic
sand. (N 2-5% cement with)

Lithology as above (< 10% cement), oyster shell frags apparently
in-situ, barnacles cement.
