

WELL CODE BW-T-3-75

ELEVATION 52'

T.D. 254'

note: samples not washed

50'-60'
 Lithology as above

60'-70'
 Abund. coarse-fine grained grey sand + 10% dense white limestone fragments, bryozoan "twigs" + sandy limestone + TR GLAUCONITE - IN C.H.

70'-80'
 Lithology as above ± 15% carbonate

80'-90'
 white-light grey limestone - mostly sandy - many grains moldic - some orange stained mass in grey sandy limestone

90'-100'
 in situ lith grey-(orange brown stained) sandy moldic limestone - much caved CASTLE HAYNE limestone + FAUNA + WACCA minor FAUNA

100'-110'
 Lithology as above ± inc free sand + dec caved lith from L.S.

110'-120'
 Lithology as above

120'-130'
 Lithology as above - dec. free sand.

50'-60' - 100'-110' = 15% carbonate
 100'-110' = from L.S.
 110'-120' = Lithology as above
 120'-130' = dec. free sand
