WELL CODE BW-T-4-75

ELEVATION 52'

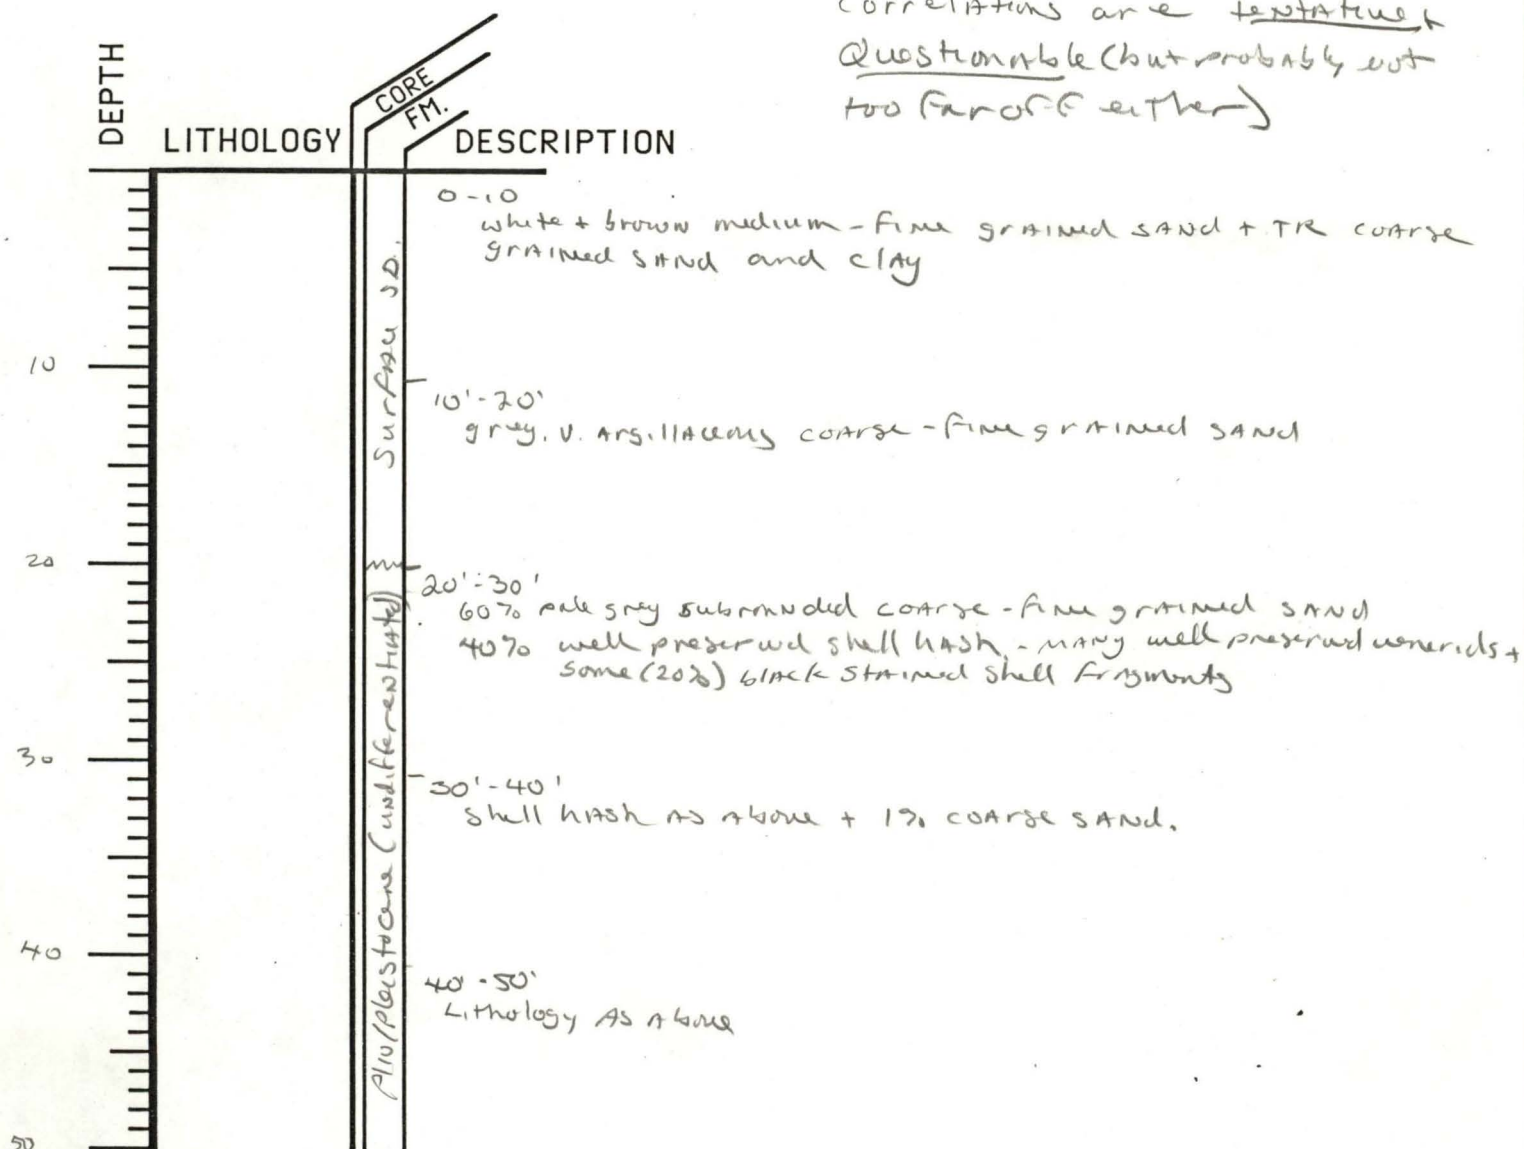

T.D. 252'

note: samples in envelopes
not washed

Samples probably poor quality -
60-130 and on are flooded &
SAND + contain traces of cement -
probably an artifact of casing.

TRAY APPARENTLY NOT accurate much
above casing -

Correlations are tentative &
questionable (but probably not
too far off either)
