

CK-T-3-84

Slide Examination

September 10, 1985

ON-T-1-85

- 0' - 30' Post Y'town forams; resembles fauna at James City on Neuse
- 30' - 40' Oligocene (?) one or two recrystallized forams, probably Olig. (River Bend)
- 40' - 50' Castle Hayne, abundant forams and several Ostracoda
- 50' - 110' Castle Hayne, few forams occur sporadically, nothing very diagnostic
- 110' - 120' One foram, a Heterohelix (K)
- 120' - 130' Unit A - Abundant forams and ostracodes
- 270' - 280' First Asciocythere sp. of Unit B

Remarks: Nothing diagnostic below Unit A

CK-T-3-84

- 0' - 30' No fauna
- 30' - 35' Post Y'town forams and same fauna occurs to 170' T.D.

HO-T-1-85

No fauna in well

HY-T-1-77

Bad slides, not identified

PE-T-1-85

- 0" - 50' No fauna
- 50' - 110' Oligocene (?) few forams
- 110' - 120' Castle Hayne, first abundant planktonic forams
- 120' - 220' No fauna
- 220' - 230' Unit A - Ostracoda and Foraminifera common

Remarks: Several Paleocene - restricted forams at 220' - 230', probably came from above but no Paleocene interval recognized on slides above 220'
