Ground Electrode In mud pit ±25' from logger

Remarks No electric log was obtained because (1) the hole was cased to 1900 feet, and (2) hole was dry. A deviation in logging depths between the up log and down log probably originated in the bottom of the hole where approximately 15 feet of the cable became snarled. ± 60' of cable left on drum @ 2340'

* H₂O rptd. @ 60' (fresh) } cased
and 2300-2500' (salt) }
