Driller: J. T. Ellington

Completed: 5/7/65

Total Depth: 1020 (driller

Static W. L.: $10\frac{1}{2}$ (topo

Casing: not yet emplaced

Bedrock: not reached

Hole Size: 14" x 1020'

Yield: est. 30-40 gpm

H₂O Temp:

Aquifers: (4)

Elev:

Geology: K?

Instrument Data

SP setting _____ Approx. 55'/min.

Res. " 50 " '/min.

Gamma " - " '/min.

T. C. " E 3

Fluid: Fresh water & drilling mud

Running Time __4 Hrs. 30 Mins.

Depth of Log: Elec. 950 Gamma -

Ground Electrode down well, 5' below SWL

Remarks "Clay ball" bridged hole @291. Pulled probe at 2 gpm so driller could knock out bridge with bailer-unsuccessful, so waited until it could be drilled out.

Started logged again at 7 pm. Clay ball stopped probe at 424. Driller cleared hole-resumed logging at 8 pm. again at 8:40 - finished 11 PM.
