SAMPLE EXAMINATION
(washed)

MIocene

CHESAPEAKE GP.

- 78-100 Clay, tan, soft, sandy, slightly glauconitic
- 100-110 Sand, quartz, fine to medium grained, angular, partly cemented with tan clay
- EOCENE NANJEMOY FM.
- 110-175 Clay, brown, marly, glauconitic, sandy, with abundant shell fragments
- 175-190 Clay, red pink, mottled with gray, firm, glauconitic with shell fragments

EOCENE

AQUIA FM

- 190-212 Clay, grey brown, glauconitic, micaceous, soft with abundant shell fragments
- 212-223 Sand, predominantly glauconite, with sand, clay and shell fragments
- 223-230 Clay, gray brown, glauconitic, soft with shell fragments
- 230-236 Sand, quartz, medium to coarse grained, abundant clay and green quartz.

GEOLOGIC SUMMARY

Pleistocene	Colombia Gp.	Surface - 78'
Miocene	Chesapeake Gp.	78 - 110'
Eocene	Pamunkey Gp. (Nanjemoy) (Aquia)	110 - 190' 190 - T. D.

GEOLOGIC LOG

- 0-90 No sample.
- 90 Sand - olive light gray; moderate clay; slightly silty; very fine to medium grained, some coarse grains; subangular to subrounded; poorly sorted; quartz; some muscovite; some black phosphatic material; few grains of glauconite; feldspar.
- 100 As above plus few granules; some glauconite.
- 110 Sand - light olive gray; slightly clayey; medium to coarse grained, some fine grains, some granules; subangular to rounded; moderately sorted; quartz; 10% glauconite (black,green); 3% black phosphatic material.
- 115 Sand - light olive gray; slightly clayey; medium grained, some coarse grains; subangular to rounded; moderately well sorted; quartz; 30% glauconite (black,green); 3% shell fragments; 2% black phosphatic material; forams common (inc. Robulus, Buccella, Cibicides, and Discorbis?); ostracodes.
- 120 Sand - light olive gray; slightly clayey; coarse to very coarse grained, some medium grains, 10% granules; subrounded; moderately sorted; quartz; 10% shell fragments; 7% black phosphatic material; 5% glauconite; some garnet; forams (inc. Robulus, Buccella, and Quinqueloculina; few spines; ostracode.
- 132 As above except 15% shell fragments; 15% glauconite; no Quinqueloculina.
- 140 Sand - olive light gray; slightly clayey; medium to very coarse grained, 15% granules; subrounded to rounded; moderately sorted; quartz; 40% glauconite; 10% shell fragments; some black phosphatic material; few spines.
- 148 Sand - olive light gray; moderate clay; medium grained, some granules; subangular to rounded; moderately well sorted; 65% glauconite; quartz; 15% shell fragments; muscovite; bone fragments.
- 154 Clay - olive light gray; abundant sand; medium to coarse grained; subangular to rounded; moderately well sorted; 50% glauconite; 30% shell fragments; quartz; 2% muscovite; some black phosphatic material; few spines; forams scarce (inc. Robulus and Nodosaria); ostracode.

Depth
(feet)

- 162 Sand - olive light gray; moderate clay; medium grained, some coarse grains, some granules; rounded; moderately well sorted; 75% glauconite; 15% shell fragments; quartz; muscovite; shark's tooth.
- 175 As above except 85% glauconite; 10% shell fragments, no sharks tooth.
- 180 Clay - moderate orange pink; moderate sand; medium to coarse grained, some fine grains, few granules; subangular to rounded; moderately sorted; quartz; glauconite 40% of sand sized fraction; 5% shell fragments; 2% black phosphatic material; some muscovite; forams rare (inc. Buccella); shark's tooth.
- 190 Clay - moderate orange pink, light olive brown; abundant sand; medium to coarse grained; subrounded to rounded; moderately well sorted; glauconite 65% of sand sized fraction; quartz; 15% shell fragments; ostracodes common; forams (inc. Cibicides and Buccella).
- 196 Sand - olive light gray; abundant clay - olive light gray, moderate orange pink; medium to coarse grained; subrounded to rounded; moderately well sorted; 75% glauconite; quartz; 10% shell fragments; muscovite (unwashed sample only).
- 202 Sand - olive light gray; abundant clay - olive light gray, moderate orange pink; fine to medium grained, some coarse grains; subangular to rounded; moderately well sorted; 50% glauconite; quartz; 20% shell fragments; forams abundant (inc. Robulus, Nodosaria, and Buccella), some muscovite; few black phosphatic fragments inc. fish tooth; ostracodes.
- 207 As above except forams (inc. Robulus and Nodosaria); no fish tooth, (unwashed sample only).
- 212 As above except 10% shell fragments.
- 217 Sand - dark olive gray; slightly clayey; medium grained; rounded; well sorted; 90% glauconite; quartz; 5% shell fragments; ostracode.
- 222 Sand - olive light gray; slightly clayey; fine to medium grained; subangular to rounded; moderately well sorted; 50% glauconite; quartz; 25% shell fragments; muscovite.
- 223 Sand - light olive gray; abundant clay; medium grained; subangular to subrounded; well sorted; 55% glauconite; quartz; 15% shell fragments; muscovite; forams rare (inc. Robulus). (unwashed sample only).
- 236 Sand - light olive gray; slightly clayey; medium to very coarse grained, some granules; subrounded to rounded; moderately sorted; quartz; 35% glauconite; 7% shell fragments; some feldspar; some garnet; forams rare (inc. Buccella).
