SAMPLE EXAMINATION  
(washed)

198-250 Sand, white, very fine to fine grained, angular

250-260 No sample

260-320 Clay, gray-tan, firm, silty with imbedded shell fragments

320-360 Clay, gray brown, firm, sandy

360-384 Sand, fine to coarse grained, angular, cemented in part with brown, calcareous clay. With foraminifera and shell fragments

384-420 Clay, tan, hard, slightly calcareous, sandy, slightly pyritic

420-450 Clay, brown, sandy, glauconitic, abundant foraminifera and shell fragments

450-475 Clay, yellow, very calcareous, abundant glauconite, sand, gravel and shell fragments

475-500 Sand, medium to coarse grained, glauconitic, subangular, with abundant tan to yellow clay and shell fragments

500-520 Sand, fine to medium grained, glauconitic, clean, few shell fragments

520-600 Sand, quartz and glauconite, abundant clay and shell fragments, occasional foraminifera. Glauconite increases in lower portion.

600-620 Clay, tan, glauconitic, very sandy, abundant shell fragments. Traces pyrite 610-620

620-650 As above but tan to yellow

650-675 Sand, predominately glauconite, with subordinate coarse quartz. Trace pyrite with shell fragments.

675-725 Clay, varicolored, pink lavender, gray yellow, firm, waxy, abundant sand, slightly glauconitic in top 25'

725-740 Sand, fine to coarse grained, subangular to rounded, abundant yellow quartz (residue)

GEOLOGIC SUMMARY

Miocene	Chesapeake Gp.	v ? -420
Eocene	Pamunkey Gp.	420 -675
