GEOLOGIC LOG

| 0-50 | No samples. |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 50-60 | Weathered Mica Schist — medium-gray-green, to light and dark-brown; foliated, medium grained; muscovite, quartz, chlorite, magnetite; minor epidote; trace hornblende, clay and iron oxides; minor vein quartz. |
| 60-70 | As above. |
| 70-80 | As above. |
| 80-90 | As above. |
| 90-100 | As above. |
| 100-110 | As above. |
| 110-120 | As above. |
| 120-130 | As above. |
| 130-140 | As above. |
| 140-150 | As above. |
| 150-160 | As above, |
| 160-170 | As above. |
| 170-180 | Weathered Mica Schist — greenish-brown to tan, foliated, medium-grained, muscovite, quartz, chlorite, minor magnetite, epidote, clay and iron oxide; minor vein quartz. |
| 180-190 | As above. |
| 190-200 | As above. |
| 200-205 | No sample. GEOLOGIC SUMMARY |

GEOLOGIC SUMMARY

These samples are of the mica schist of uncertain age.

Virginia Division of Mineral Resources Hollis N. Walker, Geologist February 7, 1966
