

INTERVAL SHEET

WWCR 119

Page 1

VDMR Well No.: Well No. 1244

Date 2/2/65

Sample Interval: from 0 to 576

PROP: A. T. & T. (Spear Mt. #2)

Total depth 576

COMP: Falwell

Oil Gas Water Exploratory

COUNTY: Buckingham

Cuttings Core Other

VDMR Well No: W-1244

Washed samples

GEOLOGIC LOG

- 0-10 Schist — orange and reddish-brown, and white, shiny; fine-grained; sericite, quartz, chlorite, minor biotite, and iron oxides.
- 10-20 As above — greenish.
- 20-25 Schist — steel-gray, shiny; fine-grained; sericite, quartz, chlorite dusty opagues (graphite ?), foliated flaky; minor iron oxides on quartz rich portion.
- 25-27 Schist — 80% light-reddish-brown, fine-grained; sericite, chlorite, quartz, minor iron oxides; porous; 20% gray schist as above.
- 27-30 As above — greenish.
- 30-40 As above — not greenish; trace only of gray schist.
- 40-50 As above — minor manganese oxides; no gray schist.
- 50-60 As above.
- 60-65 Schist — greenish-gray, lightly stained with iron oxide; sericite, chlorite, quartz, biotite; trace magnetite; corrugated foliation.
- 65-70 As above.
- 70-80 As above — greener.
- 80-90 Chlorite Schist — gray and green, shiny, minor brown iron stains; fine-grained; chlorite, sericite, quartz; minor pyrite and magnetite.
- 90-100 As above.
- 100-110 As above.
- 110-120 As above.
- 120-130 As above.
- 130-140 As above — less iron stain.

OWNER: American Telephone & Telegraph Co. - Spear Mt., Well #2

- 140-150 Chlorite Schist — gray and green, shiny, very minor brown iron stain; fine-grained; chlorite, sericite, quartz; minor pyrite and magnetite.
- 150-160 Chlorite Schist — dark-gray, shiny; fine- to medium-gray; chlorite, sericite, quartz, minor magnetite; foliated, knotted and corrugated; the quartz occurs in veins and augen.
- 160-170 As above.
- 170-180 As above.
- 180-190 As above.
- 190-200 As above — less magnetite.
- 200-210 As above.
- 210-220 As above.
- 220-230 As above.
- 230-240 As above.
- 240-250 As above.
- 250-260 As above.
- 260-270 As above.
- 270-280 As above.
- 280-290 As above.
- 290-300 As above.
- 300-310 As above.
- 310-320 As above.
- 320-330 As above.
- 330-340 As above.
- 340-350 As above.

OWNER: American Telephone & Telegraph Co. - Spear Mt., Well #2

- 350-360 Chlorite Schist — dark-gray, shiny; fine- to medium-gray; chlorite, sericite, quartz, minor magnetite; foliated, knotted and corrugated; the quartz occurs in veins and augen.
- 360-370 As above.
- 370-380 As above.
- 380-390 As above.
- 390-400 As above.
- 400-410 As above.
