GEOLOGIC LOG

Depth (feet)	
0-15	Sand — light grayish orange; moderate clay; fine to medium grained, some coarse grains; subangular to subrounded; moderately sorted; quartz; feldspar; few grains of glauconite (unwashed only).
15-80	Sand — light olive gray; very fine grained; subangular to subrounded; well sorted; quartz; 3% black phosphatic material; few shell fragments; muscovite (unwashed only).
80-85	Sand — olive light gray; moderate clay; medium grained to granular, some pebbles; subrounded; poorly sorted; quartz; 20% shell fragments; 7% black phosphatic material inc. shark's tooth; 2% bone fragments; few gypsum crystals.
85-90	Sand — olive light gray; moderate clay; medium to coarse grained, some granules; subrounded; moderately sorted; quartz; 10% shell fragments; 5% black phosphatic material; some bone fragments; some sandy limestone fragments; forams (inc. <u>Pyrulina</u>).
90-110	Sandy limestone — light olive gray; slightly clayey; abundant sand; coarse to very coarse grained, 10% granules; subrounded; moderately well sorted; 65% sandy limestone fragments; quartz; some shell fragments; some glauconite; some black phosphatic material.
110-113	Sand — light greenish gray; slightly clayey; medium to coarse grained, some granules; subrounded to rounded; moderately sorted; quartz; 15% sandy limestone and shell fragments; 7% glauconite (black, green); some pyrite.
113-123	Sand — light olive brown; slightly clayey; medium to coarse grained; subangular to rounded; moderately well sorted; 55% glauconite (brown, black, green); quartz; 2% sandy limestone and shell fragments; some spines; forams scarce (inc. <u>Robulus</u>).
123-134	Sand and coquina — light olive gray; slightly clayey; medium to coarse grained; subangular to rounded; moderately well sorted; quartz; 35% shell fragments; 15% glauconite (brown, black); 5% forams (inc. <u>Robulus</u> , <u>Buccella</u> , <u>Discorbis</u> , <u>Guttulina</u> , <u>Textularia</u> , <u>Globulina</u> , <u>Pyrulina</u> , <u>Quinqueloculina</u> , <u>Bolivina</u> , <u>Lagenaria</u> , and <u>Siphogenerina</u>); 3% spines; ostracodes abundant; pyrite.
