

OWNER: Charles M. Perry No. 2
DRILLER: Sydnor Pump & Well Co.
COUNTY: Rockingham (New Market)

VDMR # 770
WWCR # 428
TOTAL DEPTH : 303 feet

GEOLOGIC LOG

0-15	Limestone - dark gray, finely crystalline, hard, silty, trace of calcite, trace of yellowish brown silty clay (top of bedrock in this interval)
15-30	Limestone - dark gray, finely crystalline, hard, minor calcite seams
30-45	As above
45-60	As above
60-75	Limestone - dark gray, finely crystalline, hard, some calcite seams
75-90	As above
90-105	Limestone - dark gray, finely crystalline, hard, minor calcite seams
105-120	Limestone - dark gray, finely crystalline, hard, increase in number of calcite seams
120-135	Limestone - dark gray, finely crystalline, hard, considerable calcite fragments and seams
135-150	Limestone - dark gray, finely crystalline, hard, some calcite seams
150-165	As above
165-180	Limestone - dark gray, finely crystalline, hard, increase in number of calcite fragments and seams
180-195	Limestone - dark gray, finely crystalline, hard, minor calcite seams
195-210	As above
210-225	Limestone - dark gray, finely crystalline, hard, minor calcite seams
225-240	As above
240-255	As above
255-270	As above

OWNER: Charles M. Perry, No. 2 (continued)

#770

270-285	Limestone - dark gray, finely crystalline, hard, with trace of calcite
285-300	As above
300-303	No sample

GEOLOGIC SUMMARY

AGE

Ordovician

ROCK UNIT

Whitesburg limestone
