

OWNER: David E. Heatwole No. 3
DRILLER: Sydnor Pump & Well Co
COUNTY: Rockingham (Hinton)

VDMR # 786
WWCR # 433
TOTAL DEPTH : 208 feet

GEOLOGIC LOG

0-20	Dolomite - light gray, coarsely crystalline, hard, some calcite and quartz (top of bedrock in this interval)
20-40	Dolomite - light gray, some light brown, finely crystalline, hard, trace of quartz, some calcite
40-55	Dolomite - medium gray and light brown, hard, finely crystalline, some calcite, traces of quartz, some hematite stains
55-70	Dolomite - medium gray, coarsely crystalline, hard, some calcite, trace of hematite stains
70-85	Dolomite - medium gray, medium crystalline, trace of hematite stains
85-100	Dolomite - light brown, limy, sugary, hard
103	Dolomite - light gray, medium crystalline, hard
100-115	Dolomite - interbedded light gray and light brown, finely crystalline, traces of white sandy dolomite, some hematite stains
115-130	As above
130-145	Dolomite - light gray, medium to coarsely crystalline, hard, interbedded with some light brown sugary dolomite, some calcite
145-160	As above
160-175	No sample
175-190	Dolomite - interbedded light gray and light brown, hard
193	Dolomite - gray, coarsely crystalline, calcite seams, some hematite stains, some light tan sugary dolomite
190-205	Dolomite - gray, coarsely crystalline, interbedded with tan sugary dolomite, some calcite, trace of red silt
205-208	No sample
