#### GEOLOGIC LOG

0-10	Overburden - weathered schist, yellowish brown, considerable quartz, some biotite and magnetite.
10-20	As above.
20-30	Muscovite - biotite schist - considerable quartz and some magnetite (top of bedrock in this interval).
30-40	As above.
40-50	As above.
50-60	As above.
60-70	Biotite - muscovite schist - considerable quartz and some magnetite.
70-80	As above.
80-90	As above.
90-100	As above.
100-110	As above.
110-120	As above.
120-130	As above.
130-140	As above.
140-150	As above.
150-160	As above.
160-170	As above.
170-180	As above.

180-190	As above.
190-200	Biotite - muscovite schist - decrease in quartz content, some magnetite.
200-210	Biotite - muscovite schist - quartz and some magnetite.
210-220	As above.
220-230	As above.
230-240	As above.
240-250	As above.
250-260	As above.
260-270	As above.

## GEOLOGIC SUMMARY

<u>AGE</u>	<u>ROCK UNIT</u>
Precambrian	Lynchburg formation
