

INTERVAL SHEET

WWCR 963

Page 1

VDMR Well No.: Well No. 1369

Date 9/20/65

Sample Interval: from 50 to 350

PROP: Naylor Trailer Court #2

Total depth 355

COMP: C. R. Moore

Oil  Gas  Water  Exploratory

COUNTY: Albemarle (Charlottesville)

Cuttings  Core  Other

VDMR Well No: W-1369

Washed Samples

OWNER: Naylor Trailer Court - Well #2  
DRILLER: C. R. Moore  
COUNTY: Albemarle (Charlottesville)

VDMR #1369  
WWCR #963  
TOTAL DEPTH: 355'

GEOLOGIC LOG

- 0-50 No samples.
- Lynchburg Formation (50-350')
- 50-60 Gneiss — light-gray to medium-dark-gray, banded, medium-fine-grained; quartz, biotite, alkali-feldspar, muscovite; minor calcite; trace zircon and pyrrhotite.
- 60-70 As above — less banded; more feldspar.
- 70-80 As above — slightly banded; minor veins of calcite.
- 80-90 As above — no veins.
- 90-100 As above — minor hornblende.
- 100-110 As above — minor epidote.
- 110-120 Gneiss — medium-gray, medium-fine-grained, slightly banded; feldspar, quartz, biotite, muscovite, pyrrhotite; minor calcite vein with euhedral crystals.
- 120-130 As above — more vein calcite.
- 130-140 As above — less calcite.
- 140-150 As above — trace graphite.
- 150-160 As above — no graphite; minor epidote.
- 160-170 Gneiss — light-gray to medium-dark-gray, fine-grained phyllite to coarse-grained metamorphosed quartz wacke; quartz, feldspar, biotite, sericite; minor pyrite and pyrrhotite, minor veins of quartz and calcite.
- 170-180 Gneiss — medium-dark-gray, fine- to medium-grained, foliated; biotite, quartz, calcite, feldspar, epidote, minor pyrite and pyrrhotite.
- 180-190 As above.
- 190-200 As above.

OWNER: Naylor Trailer Court - Well #2

#1369

- 200-210 Gneiss — light-gray to medium-dark-gray, fine-grained to coarse-grained; slightly foliated, banded; quartz, feldspar, biotite, calcite, muscovite, epidote; minor quartz veins.
- 210-220 As above — no coarse-grained material.
- 220-230 As above — with coarse-grained portion.
- 230-240 As above — no coarse-grained material except for veins.
- 240-250 Schist — medium-gray, slightly greenish, poorly foliated, medium and fine-grained; muscovite, biotite, quartz; minor epidote and feldspar; trace pyrite; veins of quartz and calcite.
- 250-260 Gneiss — medium-light- to medium-dark-gray, banded, fine-grained; feldspar, muscovite, biotite, quartz; minor epidote; trace pyrite and calcite.
- 260-270 As above.
- 270-280 As above — slightly coarser; quartz and calcite veins, pyrite associated with veins.
- 280-290 As above — minor bands of muscovite rich schist.
- 290-300 As above — less vein material, minor pyrrhotite.
- 300-310 Gneiss — medium-dark-gray to light-gray; fine-grained to coarse-grained; banded and foliated; feldspar, biotite, quartz, muscovite, minor epidote, and calcite; trace pyrrhotite veins.
- 310-320 As above — slightly lighter, less fine-grained.
- 320-330 Gneiss — medium-gray, medium-coarse-grained, lination of minerals; quartz, feldspar, biotite, minor pyrrhotite.
- 330-340 As above.
- 340-350 As above.
- 350-355 No sample.

GEOLOGIC SUMMARY

|         | <u>ROCK UNIT</u>    | <u>TIME ROCK UNIT</u> |
|---------|---------------------|-----------------------|
| 0-50    | No samples          |                       |
| 50-350  | Lynchburg Formation | Precambrian           |
| 350-355 | No sample           |                       |

Minor fragments of iron-stained weathered gneiss of similar composition were found in all levels down to 280 feet. This material is contamination from overburden.
