## GEOLOGIC LOG

Depth in feet			
0-10	Saprolite — brown, amphibolite	weathered and iron-oxide-stained	
10-20	Amphibolite — very dark gray, fine-grained, slightly foliated; amphiboles and quartz; traces of feldspar, biotite and pyrite		
20-30	н	no pyrite	
30-40	11	very dark, reddish-gray; abundant biotite, no pyrite	
40-50	11		
50-60	11		
60-70	11	very dark, reddish-gray; schistose; abundant biotite, minor muscovite	
70-80	н		
80-90	11		
90-100	11	slightly schistose; increased amount of biotite, trace of muscovite	
100-110	11		
110-120	н		
120-130	11		
130-140	17	minor amount of biotite, trace of muscovite	
140-150	11	11	
150-160	н	11	
160-170	п	11	
170-180	11
