This map shows karst ground-water basins in the Somerset 30 x 60 minute quadrangle. The basins are marked by ground-water flow and include the area's karst development. The map is shaded to indicate the type of flow detected in the basins, with colors representing different flow types. The map includes a key that explains the symbols used to represent different flow types.

DISCLAIMER

The Kentucky Geological Survey provides online versions of its publications as a public service. Publications are provided as Adobe PDF (portable document format) files. Hard-copy versions are available for purchase by contacting the Survey at:

Kentucky Geological Survey
Publication Sales Office
228 Mining and Mineral Resources Building
University of Kentucky
Lexington, Kentucky 40506-0107

Phone: 606-257-5500
Fax: 606-257-1147

Selected KGS reports published before 1999 have been scanned and converted to PDF format. Scanned documents may not retain the formatting of the original publication. In addition, color may have been added to some documents to clarify illustrations; in these cases, the color does not appear in the original printed copy of the publication. Every effort has been made to ensure the integrity of the text. KGS maps and charts are supplied either whole or in part and some are too large to be printed on most plotters. Open-file reports are reproduced from the best available copy provided by the author, and have not undergone KGS technical or editorial review.
