Generalized Geologic Map for Land-Use Planning: Hancock County, Kentucky

E. Gunn Beck, David A. Williams, and Daniel I. Carey

Acknowledgments

This map was produced by the Kentucky Geological Survey, University of Kentucky, and the Kentucky Department of Environment and Natural Resources. The map was funded through a grant from the State Planning and Development Board, Kentucky Department of Environment and Natural Resources.

For Planning Use Only

This map is not intended to be used for legal or other purposes. It is intended to assist in land-use planning. The map is based on geological data and geologic mapping of the area. The map is intended to show the distribution of rock units, soil types, and water bodies. The map is intended to assist in land-use planning, but it should not be used as a substitute for geologic data or other information. The map is not intended to be used for any other purpose.

Groundwater Availability

Groundwater availability is influenced by the geology of the area. Groundwater is stored in rock units and soil types. The map shows the distribution of rock units and soil types in the area. The map is intended to assist in land-use planning, but it should not be used as a substitute for geologic data or other information.

Water Wells

Water wells are shown on the map. The map is intended to assist in land-use planning, but it should not be used as a substitute for geologic data or other information.

Planning Guidance by Rock Unit Type

The map shows the distribution of rock units in the area. The map is intended to assist in land-use planning, but it should not be used as a substitute for geologic data or other information.

Additional Planning Resources

This map was produced by the Kentucky Geological Survey, University of Kentucky, and the Kentucky Department of Environment and Natural Resources. The map was funded through a grant from the State Planning and Development Board, Kentucky Department of Environment and Natural Resources.
