James C. Cobb, State Geologist and Director  
University of Kentucky, Lexington

**Groundwater Quality in Watersheds of the  
Big Sandy River, Little Sandy River, and  
Tygarts Creek  
(Kentucky Basin Management Unit 5)**

**R. Stephen Fisher, Bart Davidson, and Peter T. Goodman**

## **Our Mission**

Our mission is to increase knowledge and understanding of the mineral, energy, and water resources, geologic hazards, and geology of Kentucky for the benefit of the Commonwealth and Nation.

## Figures

1. Map showing major watersheds, physiographic regions, and basin management units in Kentucky .....	5
2. Map showing major watersheds and counties in basin management unit 5.....	6
3. Example of a cumulative data plot, showing all pH values reported in Kentucky groundwater .....	12
4. Example of a box-and-whisker plot showing all pH measurements in Kentucky groundwater .....	12
5. Cumulative plot of pH values.....	13
6. Map showing locations of sampled sites and ranges of pH values.....	14
7. Graph summarizing pH values grouped by watershed .....	15
8. Graph comparing pH values from wells and springs.....	15
9. Graph showing well depth versus pH values.....	15
10. Cumulative plot of total dissolved solids values .....	16
11. Map showing locations of sampled sites and ranges of total dissolved solids values .....	17
12. Graph summarizing total dissolved solids values grouped by watershed.....	18
13. Graph comparing total dissolved solids values from wells and springs .....	18
14. Graph showing total dissolved solids values versus well depth.....	18
15. Cumulative plot of conductance values .....	19
16. Map showing locations of sampled sites and ranges of conductance values .....	20
17. Graph summarizing conductance values grouped by watershed.....	21
18. Graph comparing conductance values from wells and springs .....	21
19. Graph showing conductance values versus well depth.....	21
20. Cumulative plot of hardness values .....	22
21. Map showing locations of sampled sites and ranges of hardness values .....	23
22. Graph summarizing hardness values grouped by watershed.....	24
23. Graph showing hardness values versus well depth.....	24
24. Cumulative plot of total suspended solids values.....	24
25. Map showing locations of sampled sites and ranges of total suspended solids values.....	25
26. Graph summarizing total suspended solids values grouped by watershed .....	26
27. Graph showing total suspended solids values versus well depth .....	26
28. Cumulative plot of chloride concentrations .....	27
29. Map showing locations of sampled sites and ranges of chloride values.....	28

## **Figures (Continued)**

30.	Graph summarizing chloride concentrations grouped by watersheds .....	29
31.	Graph summarizing chloride concentrations from wells and springs .....	29
32.	Graph showing chloride concentrations versus well depth.....	29
33.	Cumulative plot of sulfate concentrations .....	30
34.	Map showing locations of sampled sites and ranges of sulfate values .....	31
35.	Graph summarizing sulfate concentrations grouped by watershed.....	32
36.	Graph summarizing sulfate concentrations from wells and springs.....	32
37.	Graph showing sulfate concentrations versus well depth.....	32
38.	Cumulative plot of fluoride concentrations.....	33
39.	Map showing locations of sampled sites and ranges of fluoride values .....	34
40.	Graph summarizing fluoride concentrations grouped by watershed .....	35
41.	Graph summarizing fluoride concentrations from wells and springs.....	35
42.	Graph showing fluoride concentrations versus well depth .....	35
43.	Cumulative plot of arsenic concentrations.....	36
44.	Map showing locations of sampled sites and ranges of arsenic values.....	37
45.	Graph summarizing arsenic concentrations grouped by watershed .....	38
46.	Graph comparing total and dissolved arsenic concentrations.....	38
47.	Graph showing arsenic concentrations versus well depth.....	38
48.	Cumulative plot of barium concentrations .....	39
49.	Map showing locations of sampled sites and ranges of barium values .....	40
50.	Graph summarizing barium concentrations grouped by watershed.....	41
51.	Graph comparing total and dissolved barium concentrations .....	41
52.	Graph showing barium concentrations versus well depth .....	41
53.	Map showing locations of sampled sites and ranges of mercury values .....	43
54.	Cumulative plot of iron concentrations.....	44
55.	Map showing locations of sampled sites and ranges of iron values.....	45
56.	Graph summarizing iron concentrations grouped by watershed .....	46
57.	Graph comparing total and dissolved iron concentrations.....	46
58.	Graph comparing iron concentrations in wells and springs .....	46
59.	Graph showing iron concentrations versus well depth .....	46
60.	Cumulative plot of manganese concentrations .....	47
61.	Map showing locations of sampled sites and ranges of manganese values .....	48
62.	Graph summarizing manganese concentrations grouped by watershed .....	49
63.	Graph comparing total and dissolved manganese concentrations .....	49
64.	Graph comparing manganese concentrations from wells and springs .....	49
65.	Graph showing manganese concentrations versus well depth .....	49
66.	Cumulative plot of nitrate-nitrogen concentrations .....	50
67.	Map showing locations of sampled sites and ranges of nitrate-nitrogen values .....	52
68.	Graph summarizing nitrate-nitrogen concentrations grouped by watershed .....	53
69.	Graph comparing nitrate-nitrogen concentrations from wells and springs .....	53
70.	Graph comparing total and dissolved nitrate-nitrogen concentrations .....	53
71.	Graph showing nitrate-nitrogen concentrations versus well depth .....	53
72.	Cumulative plot of nitrite-nitrogen concentrations.....	54
73.	Map showing locations of sampled sites and ranges of nitrite-nitrogen values .....	55
74.	Graph summarizing nitrite-nitrogen concentrations grouped by watershed .....	56
75.	Graph comparing nitrite-nitrogen concentrations from wells and springs.....	56

## Figures (Continued)

76.	Graph comparing total and dissolved nitrite-nitrogen concentrations .....	56
77.	Graph showing nitrite-nitrogen concentrations versus well depth .....	56
78.	Cumulative plot of ammonia-nitrogen concentrations .....	57
79.	Map showing locations of sampled sites and ranges of ammonia-nitrogen values .....	58
80.	Graph summarizing ammonia-nitrogen concentrations grouped by watershed .....	59
81.	Graph comparing total and dissolved ammonia-nitrogen concentrations .....	59
82.	Graph showing ammonia-nitrogen concentrations versus well depth .....	59
83.	Cumulative plot of orthophosphate concentrations .....	60
84.	Map showing locations of sampled sites and ranges of orthophosphate values .....	61
85.	Graph summarizing orthophosphate concentrations grouped by watershed .....	62
86.	Graph showing orthophosphate concentrations versus well depth .....	62
87.	Cumulative plot of total phosphorus concentrations .....	62
88.	Map showing locations of sampled sites and ranges of total phosphorus values .....	63
89.	Graph summarizing total phosphorus concentrations grouped by watershed .....	64
90.	Graph comparing total and dissolved phosphorus concentrations .....	64
91.	Graph showing total phosphorus concentrations versus well depth .....	64
92.	Map showing locations of sampled sites and ranges of 2,4-D values .....	66
93.	Map showing locations of sampled sites and ranges of alachlor values .....	68
94.	Map showing locations of sampled sites and ranges of atrazine values .....	70
95.	Map showing locations of sampled sites and ranges of cyanazine values .....	72
96.	Map showing locations of sampled sites and ranges of metolachlor values .....	74
97.	Map showing locations of sampled sites and ranges of simazine values .....	76
98.	Map showing locations of sampled sites and ranges of benzene values .....	78
99.	Map showing locations of sampled sites and ranges of ethylbenzene values .....	80
100.	Map showing locations of sampled sites and ranges of toluene values .....	82
101.	Map showing locations of sampled sites and ranges of total xylenes values .....	84
102.	Map showing locations of sampled sites and ranges of MTBE values .....	86

## Tables

A1.	Summary of nonpoint-source effects on groundwater quality in basin management unit 5 .....	2
1.	Watershed names and six-digit HUC designations for basin management unit 5 .....	7
2.	Watershed names and eight-digit HUC designations for basin management unit 5 .....	7
3.	Sites used for monitoring .....	8
4.	Parameters and water-quality standards used for data summaries .....	11
5.	Summary of pH values .....	13
6.	Summary of total dissolved solids values .....	16
7.	Summary of conductance values .....	19
8.	Hardness classification of water supplies .....	22
9.	Summary of hardness values .....	22
10.	Summary of total suspended solids values .....	24
11.	Summary of chloride concentrations .....	27
12.	Summary of sulfate concentrations .....	30
13.	Summary of fluoride concentrations .....	33
14.	Summary of arsenic concentrations .....	36

## **Tables (Continued)**

15.	Summary of barium concentrations .....	39
16.	Summary of mercury concentrations.....	42
17.	Summary of iron concentrations .....	44
18.	Summary of manganese concentrations.....	47
19.	Summary of nitrate-nitrogen concentrations.....	50
20.	Summary of nitrite-nitrogen concentrations.....	54
21.	Summary of ammonia-nitrogen concentrations.....	57
22.	Summary of orthophosphate concentrations.....	60
23.	Summary of total phosphorus concentrations .....	62
24.	Summary of 2,4-D concentrations .....	65
25.	Summary of alachlor concentrations .....	67
26.	Summary of atrazine concentrations .....	69
27.	Summary of cyanazine concentrations .....	71
28.	Summary of metolachlor concentrations.....	73
29.	Summary of simazine concentrations.....	75
30.	Summary of benzene concentrations .....	77
31.	Summary of ethylbenzene concentrations .....	79
32.	Summary of toluene concentrations .....	81
33.	Summary of total xylenes concentrations .....	83
34.	Summary of MTBE concentrations.....	85
35.	Summary of nonpoint-source effects on groundwater quality in basin management unit 5 .....	88
